Broken Floe-berg

Title: Broken Floe-berg

Reference: LS99/2/20

Reference: LS99/2/20

Title: Broken Floe-berg

Description: glass lantern slide

Collection: British Arctic Expedition 1875-76

Summary text: A large iceberg surrounded by ice boulders trapped in the ice in the neighbourhood of the sailing ship 'Alert's winter quarters. It has a large vertical crack, caused by extreme temperature. A sledge stands on the ice at the berg's base.

Date: 1876

Keywords: icebergs sledges

Location: Greenland

Photographer: Mitchell, Thomas
